

# A+LS™ High School Credit Recovery Bundle

*Pretests and assessments give students an advantage in recovering course credits.*

Assisting high school students who have failed or are at risk of failing a course can be quite a challenge. Join the growing number of schools and institutions using the *A+nyWhere Learning System*® (A+LS™) courseware program to get your students back on track and on the road to on-time graduation.

The backbone of the A+LS Credit Recovery Bundle is a series of comprehensive assessments that test students in five core curricular subject areas – Mathematics, Literature and the Arts, Writing, Science, and Social Sciences. Pretests pinpoint individual student skill deficiencies and automatically assign lessons that teach those skills. After students progress through the self-paced lesson material, post-tests measure and record academic gains, indicating whether students have displayed mastery of the lesson material.

The *A+nyWhere Learning System* courseware uses the proven instructional format of study, practice test, mastery test, and essay (or constructed response) to prepare students for the recovery of course credit or the prevention of course failure.

### Choose from Our Recommended Title List or Pick Your Own!

The recommended A+LS Credit Recovery Bundle is comprised of 34 *A+nyWhere Learning System* titles. These titles contain over 1,400 hours of study and are aligned to all state and national standards. You also have the option of customizing your A+LS Credit Recovery Bundle by choosing 34 titles from our extensive courseware offering.
